

ABOUT US

Our Green DNA

OUR GREEN PRACTICE - the people of **SKS** Group have always understood, believed and recognised the importance of preserving nature. Hence, **SKS** continuously plays its role to reduce the carbon footprint of its production processes.

SKS have been replacing manual operations that are laborious and environmentally unfriendly to semi & fully automated machines like laser cutting machines and robotic welders, which are able to increase productivity whilst consuming less energy in the process. Moreover, initiatives towards replacing boilers, heaters, lightbulbs, air-conditioning units and other similar equipment with certified 5-star energy rating components is also the **SKS** way of going green.

Other green practices such as reducing environmental pollution and waste management have never been taken lightly by the team. By investing into an epoxy recycling plant and other waste treatment plants within the vicinity since the early 90s, we believe it has been a norm for all of us in doing our fair share for our planet Earth.

In the modern world today, where we have no doubt that the environment is suffering, **SKS** is actively spreading its green culture to its suppliers by issuing purchase priorities only to those with green practices.

CORPORATE SOCIAL RESPONSIBILITIES - besides the environment, contributing to the society we all live in is also a step that the people of **SKS** have taken together. Our share of CSR includes cash donations from recycled scrap collections to the needy, and from recycling scrap metal to provide free refurbished used furniture to non-profitable charity organisations.

ISO CERTIFICATION - **SKS** is certified ISO 9001:2015 for total quality manufacturing since 1985, ISO 13485:2003 for complying to medical device manufacturing, ISO 14971 for complying to total risk assessment in manufacturing, ISO 14001:2015 for complying to understanding of Green House Gas emissions (GHG) and have disclosed our 2012 GHG emissions to the Carbon Disclosure Project (CDP). CDP is an organisation based in the United Kingdom that works with shareholders and corporations to disclose greenhouse gas emissions of major corporations.

1 NUMBERS	Established 49+ Years	Supply to 60+ countries	Total floor area 1 million + sq. ft.	Completed over 4000+ hotels globally	#1 Green FFE Manufacturing in Asia
2 STANDARDS	ISO 14001	ISO 9001	ISO 13485	VCS VERIFIED CARBON STANDARD	CDP DRIVING SUSTAINABLE ECONOMIES

3 OUR MACHINERIES

SKS's factory is made up of semi and fully automated state of the art green label machineries that allow customization at its very best. With cutting edge technologies and pneumatic controls to increase precision, mass production could be run seamlessly and accurately.

REUSEABLE ENERGY, REDUCTION & RECYCLING
